ABOUT ME

Future graduate engineer from ENSEEIHT in the 3EA program, I am specializing in embedded systems and signal processing. Passionate about mobility and technological innovation, working in the transportation industry has always been a primary goal. Joining a company like Airbus, a leader in aeronautics, represents the ideal opportunity for me to apply my skills and contribute to cutting-edge projects.

EDUCATION

ENSEEIHT — Toulouse 2024 - Present

Engineering Degree in Electronics & Electrical Engineering

- 3EA Department (Electronics, Electrical Energy, Automation)
- Systems Integration (InSys) Track

Henri Wallon CPGE — Valenciennes 2022 - 2024

*Preparatory Classes MPSI / MP**

Intensive preparation for engineering school entrance exams

Institution La Croix Blanche 2015 - 2022

French Baccalauréat with distinction

Specializations: Mathematics & Physics-Chemistry

EXPERIENCE

Connected Objects Project — ENSEEIHT Mar - May 2025

Cardiac Sensor Design

- Amplifier circuit design
- Analog-to-Digital Converter implementation
- Digital signal processing

Operator Intern — Fives FCB Jun - Jul 2025

Physical/chemical analysis and industrial handling operations

Versatile Employee — Carter-Cash Aug 2025

Delivery reception and customer relations management

TECHNICAL SKILLS

Programming

C / C++ Python VHDL

Tools & Software

OrCAD PSpice Vivado MATLAB

Other

Driver's License (B)

SOFT SKILLS

- Working under pressure
- Efficiency and time management
- Organization and planning

LANGUAGES

French	Native
English	B2 (Upper Intermediate)
Japanese	Beginner

INTERESTS

Sports

Running, Tennis (7 yrs), Handball (7 yrs + University)

Hobbies

Motorsports, Chess (N7etMat club)
